

# Inkscape vejledning

## 1. Download og Opsætning af dokument

Inkscape hentes og downloades via dette link:

[https://inkscape.org/da/download/windows/.](https://inkscape.org/da/download/windows/)

Når programmet er installeret får man valget ift. sprog i programmet. I denne vejledning er programmets sprog sat til engelsk, men genvejstaster og ikoner er det samme, så det har ingen betydning.

The screenshot shows the Inkscape website interface. At the top left is the Inkscape logo with the tagline "Draw Freely.". To the right is a language selector set to "dansk" and a search box labeled "Søg". Below the header is a navigation menu with links for "ABOUT", "DOWNLOAD", "NEWS", "COMMUNITY", "LEARN", "CONTRIBUTE", and "DEVELOP". The main content area has a breadcrumb trail "Forside » Download » Windows" and a large heading "Get Inkscape for Windows". Below this, it states "Latest stable version: Inkscape 0.92.1" with a link to "Read the release notes". There are two sections for downloads: one for 32-bit Windows versions and one for 64-bit Windows versions. Each section features a download icon (a black Inkscape logo with a green arrow pointing down) and a list of available file formats: installer (exe), installer (msi), binary archive (7z), and PortableApps.com Format (paf.exe). A note in each section states: "Note: exe and msi installers are equivalent but not compatible (i.e. one can not update the installation, in doubt which version to download, the exe installer is usually the right choice.)"

**INKSCAPE**

## Get Inkscape for Windows

Latest stable version: Inkscape 0.92.1

→ [Read the release notes](#)

### Downloads for 32-bit Windows versions

 All files available for **32-bit Windows**:

- [installer \(exe\)](#)
- [installer \(msi\)](#)
- [binary archive \(7z\)](#)
- [PortableApps.com Format \(paf.exe\)](#)

*Note: exe and msi installers are equivalent but not compatible (i.e. one can not update the installation, in doubt which version to download, the exe installer is usually the right choice.)*

### Downloads for 64-bit Windows versions

 All files available for **64-bit Windows**:

- [installer \(exe\)](#)
- [installer \(msi\)](#)
- [binary archive \(7z\)](#)

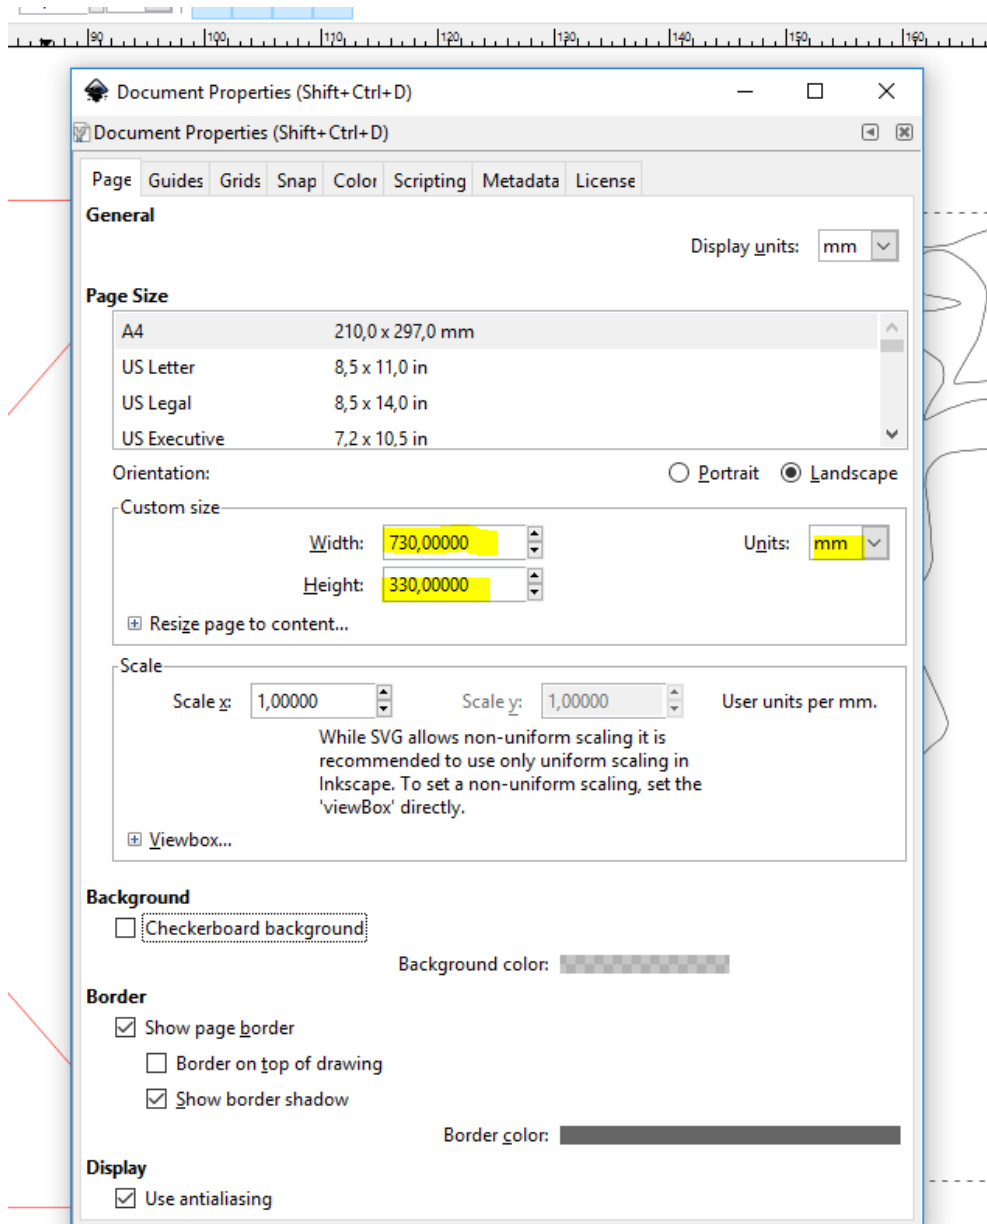

*Note: exe and msi installers are equivalent but not compatible (i.e. one can not update the installation, in doubt which version to download, the exe installer is usually the right choice.)*

Det første man bør gøre når man åbner et nyt dokument i Inkscape, er at sætte størrelsen på det dokument man vil arbejde med. Genvejstasten er **Shift + Ctrl + D**.

Størrelsen er som standard A4. Man bør sætte bredde og højde i mm.

Fablab Guldborgsunds plader er som standard **730 mm x 330 mm**, men størrelsen på dokumentet skal selvfølgelig sættes efter det behov man har.

Efter at man har sat størrelsen lukkes vinduet og dokumentet er opdateret med den nye størrelse.
